SKILLS

HTML5	CSS	JavaScript	React
Python3	Git	Apollo-server	Express
Jest	Supertest	MySQL	Node
GraphQL	Styled-components	Material-UI	Redux

PROJECTS

Sauti Databank Jan. 2020 to Mar. 2020

- View Github here - <https://github.com/Lambda-School-Labs/sauti-databank-fe>
- Refactored the backend to Apollo-server.
- Created new role in MySQL database of paid user and worked with a team to integrate Paypals subscriptions API to our application for paid users.
- Implemented the ability to share the website on Twitter and Facebook via their SDKs.

Disney Parent Nov. 2019

- View Github here - <https://github.com/Build-Week-Web26-Disney-Parents/BE>
- Designed Postgres database for users, posts, replies, and instant messages.
- Developed a secure authentication system using json web tokens, as well as secure routes based off user id and if the user is logged in.
- API creates the ability for users to create posts, reply to other posts, as well as message users directly.

Lendr Oct. 2019

- View Github here - <https://github.com/JoshHill15/lendr>
- Collaborated on design with the other frontend developer.
- Created intuitive routing with react-router-dom and validation on forms.
- Implemented state management with Redux.

EMPLOYMENT

Lambda School · Team Lead · Jan. 2020 to Mar. 2020
